

31

0

error\_data[31:0]

The diagram illustrates a 32-bit register structure. It features a top row of 32 vertical tick marks, each representing a bit position from 31 down to 0. Below this row is a large white rectangular box with a black border, labeled "error\_data[31:0]" in bold black font, representing the data field. A bottom row of 32 vertical tick marks is positioned directly beneath the white box, corresponding to the bit indices above. The entire structure is set against a solid black background.
